## Regulatory Information

This guide applies to Model Number MP6000 series and its optional accessories. All Zebra devices are designed to be compliant with rules and regulations in locations they are sold and will be labeled as required. Local language translations are available at the following website:

<http://www.zebra.com/support>.

Any changes or modifications to Zebra equipment, not expressly approved by Zebra, could void the user's authority to operate the equipment.

Only use Zebra approved and UL Listed or Recognized accessories.

Declared maximum operating temperature: 40°C.

### LED Devices

### Power Supply

Use ONLY an approved UL LISTED ITE (IEC/EN 60950-1, LPS) power supply with electrical ratings: Output 12 V dc, min 3.33 A, with a maximum ambient temperature of

at least 40°C. Use of alternative power supply will invalidate any approvals given to this unit and may be dangerous.

### Radio Frequency Interference Requirements-FCC

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio

frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help.

### Radio Frequency Interference Requirements - Canada

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

## Non-automatic Weighing Instruments Models MP62XX & MP65XX

The first step of the verification has been carried out at the manufacturing plant. It comprises all tests according to EN 45501-8.2.2.

Scanner/Scales defined for Gravity Zones and marked with Latitude and Elevation range can only be used in predefined zone and are ready for immediate use.

Scanner/Scales not defined for Gravity Zones (unmarked Latitude and Elevation range) that will be used for trade is subject to Legal W&M requirements, required verification tests. These tests can only be performed by Manufacturer, his/her legal representative or National Competent Authorities for Weights & Measures. Please contact your Zebra Services organization.

Connection of the NAWI to a Point of Sale (POS/PC) system requires POS manufactures or owners of the equipment to ensure Declaration of Conformity for complete system.

Declaration of Conformity can be found at http://www.zebra.com/doc
